

# BRIDGEWALKER TYPE 1

Offering the smallest working footprint with a variety of configurations

From the trailer or as a stand-alone, our own patented BridgeWalker Type 1 is designed for use in tight areas, and can be operated from a sidewalk as to not impeded traffic flow.

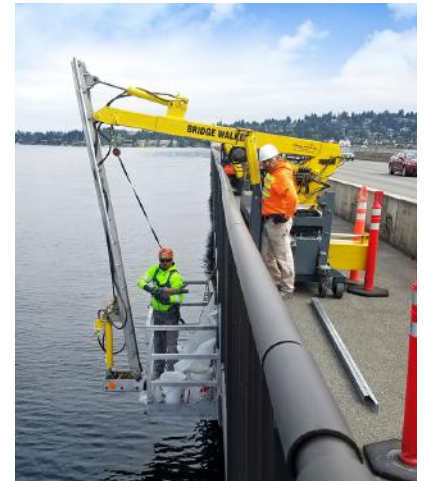

2-MAN WORK BASKET -OR- INSPECTION BASKET

➡ **FITS ON A SIDEWALK**

➡ **500 lb BASKET CAPACITY**

➡ **LADDER LENGTH OPTIONS TO MEET JOB SPECIFICS**

At only three feet width and with a basket capacity of 500 pounds, the Bridgewalker Type I is very useful in tight areas and can operate from the sidewalk, so it won't impair traffic flow. This unit can place workers up to 14 feet below a bridge handrail and up to 10 feet under the bridge. Any work along the edge of deck is easily accomplished with a variety of basket configurations and vertical ladder lengths.

## UTILITY INSTALLATION

After installing over 500,000 linear feet of utilities under virtually every profile of bridge, we fully understand the associated challenges. We would love to assist on your next project and help make it go as smooth as possible.

## BRIDGE INSPECTION

Bridge Masters Inc. has over 2 decades of hands-on experience in this specialized field. Through these years we have been vigorously perfecting our methods and machines. Allow us to help you benefit from these refinements.

## SPECIFICATIONS

PLATFORM SPECS		MAXIMUM REACH		ft/m	VEHICLE INFO	
Working Surface (Inspection basket)	92" x 36" x 42" 234 x 91 x 107cm	Under Reach	from handrail (42" height)	10/3.05	For more specific vehicle options, capabilities, and dimensions please contact one of our specialists at:  <b>Todd@bridgemastersinc.com</b> or call <b>1.888.851.0744</b>	
Working Payload	500 lb/227 kg	Down Reach	from level surface	10.5/3.2		
		Down Reach	from handrail	14/4.27		

Max Horizontal Reach Under Bridge

Max Vertical Reach Under Bridge

### OPERATES ON SIDEWALK

The Bridgewalker Type I requires only 3 ft width, and is self-propelled to move down a working path as needed. Though small, it still boasts an under-bridge payload capacity, and capability, equal to many larger UBITS.

### EXCLUSIVE PATENTED SYSTEM

Developed and patented by Bridge Master Inc.. Our Bridgewalker Type I was created to meet a specific range of requirements that we could not find in other available units. All components are manufactured in the USA.

### CAN ACCOMPLISH MORE

The unique design and purpose of the Bridgewalker Type I unit is to operate in tight spaces where other cranes are not able. This may be the perfect solution for your next limited space utility or inspection project.
